WORK EXPERIENCE

SDE Intern

Feb 2026 – Present

Spikewell

- Developed **RESTful APIs** with **Node.js** and **Express.js** to integrate data pipelines from Azure Data Lake and Salesforce Commerce Cloud, improving structured data flow and reducing response time.
- Built **FastAPI-based microservice** to implement a RAG system over organizational knowledge bases for finance, Compliance, Infra.

Backend Developer Intern

Aug 2025 – Jan 2026

MultiLipi

- Designed and implemented **sub-domain** and **subdirectory** based translation microservices using **Django**, **Django REST Framework** improving scalability and enabling seamless multilingual content delivery.
- Implemented a dynamic layer to serve **llms.txt manifests**, optimized **Markdown content** and **Schema.org** for translated subdomains improving AI crawler discoverability.
- Built an custom **HTML parsing engine** that extracts user-visible content and groups it to provide accurate semantic context, lowering translation costs without sacrificing quality
- Hardened API security at the **load balancer** level by profiling suspicious traffic patterns (**cURL**, **Python requests**) and implementing detection rules

Achievements

- LeetCode Knight** — peak rating **1872** | ranked **763 globally** out of **27,000+** participants | solved **1,200+** problems | top **5% worldwide**
- National semi-finalist, Flipkart GRiD 7.0**

TECHNICAL SKILLS

Languages: Python, JavaScript, C/C++, SQL
Frameworks: Django, FastAPI, Node.js, Express.js, Celery, React
Databases: MongoDB, PostgreSQL, Redis
DevOps & Cloud: AWS(EC2, ELB, S3, Lambda), Azure, Docker, GitHub Action, Vercel
CS Fundamentals: Operating Systems, Computer Networks (TCP/IP, HTTP), DBMS, OOP, Concurrency
Developer Tools: Git, GitHub, Linux, Postman, VS Code

EDUCATION

Silicon University

Nov 2022 - May 2026

B.Tech in Computer Science and Engineering - CGPA: 9.37

Bhubaneswar, India

PROJECTS

Fourio | Python, FastAPI, Typer, MongoDB, NumPy, FFmpeg, DSP

[Github Link]

- Engineered a backend + CLI for music recognition system using FastAPI, implementing a custom **Audio-fingerprinting algorithm** to process and index audio streams from Spotify and YouTube.
- Optimized the audio processing pipeline using multiprocessing and parallelized track analysis across CPU cores, reducing track analysis time from **200+ seconds to under 10 seconds**.
- Designed a high-throughput storage strategy using **MongoDB bulk operations**, enabling the stable upsert of **70,000+ unique hashes** per track while resolving multi-process write contention.

Master Of Keys | Django, React, PostgreSQL, Redis, Celery

[Github Link]

- Designed and built a multiplayer typing platform and let users track their progress.
- Implemented secure user flows with **JWT-based authentication** and email verification.
- Integrated **Redis caching** at application and URL level to improve response time.
- Used Celery for **async background tasks** such as **email notifications** and stats calculations.
